French scientific baccalaureate

Lycée Voillaume (high school), Aulnay-sous-Bois (2011 - 2014)

- ♦ Core curriculum with Engineering Sciences
- ♦ Mathematics specialization
- ♦ European language option (English and Mathematics)

Skills

- ♦ **Front-end** : JavaScript (TypeScript), Vue.js (VueX, Pinia, Nuxt.js), React.js (Zustand, Next.js), Tailwind CSS
- ♦ **Back-end** : Node.js (Express.js, Hono.js, Nest.js), SQL, GraphQL
- ♦ **Test** : Vitest, Playwright, Cypress
- ♦ **ORM/ODM** : Prisma, TypeORM, Mongoose
- ♦ **Database** : SQLite, PostgreSQL, MongoDB, Firebase
- ♦ **Web interface** : Figma, Sketch
- ♦ **Languages** : French (fluent), English (professional proficiency), Vietnamese (mother tongue), German (basic knowledge)

Interests

- ♦ Technology and scientific watch
- ♦ Coding challenges (TypeHero and LeetCode)
- ♦ Rucking

I am a *front-end* developer with over 4 years of experience, specializing in **Vue.js**, with additional experience in **React.js** and in *back-end* development with **Node.js**. I build *high-performance*, *accessible*, and *responsive* web applications, from interface design to *API* integration.

Professional Experience

March 2026

Sharpn, Staky and Lend Onchain (same core team)

Web application for a regulated *tokenized* fractional real estate platform

- ♦ Lend (*work in progress*) : lend.xyz (Nuxt.js 3, Pinia, Vitest, Playwright, Tailwind CSS, Express.js and Golang)
- ♦ Development of *composables* with type safety (modal, cache, and notification systems)
- ♦ Platform for testing *onchain* calls similar to *API Platform* in the development environment
- ♦ Verification of accessibility and SEO best practices
- ♦ Definition and validation of API route types

NFT *marketplace* on the ICON *blockchain*

- ♦ Craft (*discontinued project*) : craft.network (Nuxt.js 2, VueX, Tailwind CSS and Firebase)
- ♦ NFT product creation funnel
- ♦ NFT product page with user interaction and transaction history
- ♦ *Blockchain* transaction management

Cryptocurrency *staking* platform

- ♦ Staky (*discontinued project*) : staky.io (Nuxt.js 2, VueX, Tailwind CSS and Firebase)
- ♦ *Staking* simulation
- ♦ Authentication via Firebase *providers*
- ♦ User wallet dashboard

July 2020

Nov. 2019

Meero (rebranded as Diffusely)

Collaborative file-sharing application

- ♦ MeeroDrop (*discontinued project*) : meerodrop.com (Vue.js 2, VueX, Vuetify, Cypress and Symfony with API REST)
- ♦ User registration and media upload funnel
- ♦ List of media folders and customizable media gallery
- ♦ Comment and like system
- ♦ Internationalization and accessibility

July 2019

Sep. 2018

Wait And See Agency

Integration of mockups in collaboration with **Studio 221** for various clients (Vue.js, WordPress and Laravel)

- ♦ Integration with a template engine
- ♦ Implementation of a *WYSIWYG* editor

July 2018

Key Personnel Project

April 2019

Gaëtan LEFEBVRE's portfolio (*discontinued project*)

Portfolio website for a designer comrade

- ♦ gaetanlefebvre.fr (Nuxt.js 2 and GSAP)
- Distinctions **Awwwards** :
 - ♦ honorable mention : www.awwwards.com/sites/gaetan-lefebvre-portfolio
- ♦ Mobile Excellence : x.com/hetic/status/1115600248448020483

Jan. 2019
